UNIFORM TERMS

1. We give 5 per cent. discount for cash with straight orders for plants, or 3 per cent. on orders for plants and planting service.
2. We give credit to end of month following date of bill to customers of approved standing.
3. We charge interest at 6 per cent. per annum or not less than 2 per cent. minimum from date of bill on overdue accounts.
4. We guarantee all plants true to name and up to specifications, but at no greater liability than to replace with correct kinds without charge or cost of transportation.
5. For goods damaged in transportation, other than by our own conveyance, we guarantee proper adjustment on the part of the carrier up to 50 per cent. of the bill, and will ourselves conduct the claim.
6. We will refurbish new plants at half the prices then current for those that may die within seven months, with an additional allowance of ten per cent. for transportation, where necessary, provided the bill be settled in full within the monthly period mentioned in paragraph two. Planting charges, where work was originally done by us, less twenty per cent.
7. All claims for damages to plants must be made within ten days of receipt of goods, and for death of plants, within seven months.
8. We are anxious to please, and to treat our customers fairly. Always frankly call our attention to any apparent fault.
9. We give the same good attention to small orders as to large.
10. Our plants are freshly dug to order. This enhances the value to the purchaser. But it also makes the preparation of a small order expensive. We charge 50 cents additional on each order under five dollars in herbaceous perennials or potted stock, and one dollar on each order under ten dollars of trees, evergreens and miscellaneous goods.

IMPORTANT DELIVERY DETAILS

These delivery regulations are furnished every purchaser and are understood to form part of the agreement of sale.

1. We deliver free within fifteen miles of our Nursery.
2. Plants loaded on our delivery truck have a large protective covering thrown over the roots. Individual bundles are not separately packed, except evergreens, the roots of each plant being balled and burlapped.
3. Purchasers preferring to have their order packed separately from others and delivered with extra protection for holding over till following day, may have this extra service for 20 per cent. additional.
4. It is expected someone will be at home on the arrival of goods to take them in charge. Our driver will, where necessary, put plants under shelter, but cannot stop to undertake unusual care of goods delivered. If bagging or old carpet is given him for the purpose, he will cover the roots.
5. Delivery routes are sometimes long, and as freshly dug plants cannot well be got ready long in advance, the hour of delivery on a given date must always be in doubt. PURCHASERS ARE EXPECTED TO ARRANGE TO HAVE PLANTING DONE THE DAY FOLLOWING THAT ON WHICH DELIVERY HAS BEEN PROMISED. This avoids keeping men awaiting the arrival of plants. Notification of intended delivery will be made when the date has not been previously set.
6. Practically all plants are dug fresh to order from our 225-acre Dresher place. It requires time. We make all deliveries promptly, but usually require a week's notice to complete all arrangements. This applies as well to goods to be called for, which must invariably be ordered in advance.

"You can't afford to experiment
Put your planting problems up to Meehans"

"MEEHAN-GROWN" represents a standard set for the products sent out from the Meehan Nurseries.

Years ago, when labor saving and quick marketing as well as modern efficiency were little thought of, the specifications for the producing of "Meehan-Grown" trees, shrubs, evergreens and perennials were set. Ever since, no effort has been spared to maintain this standard.

Costs of production have risen and likewise prices have advanced but quality and price have always been kept consistent.

AT MEEHANS

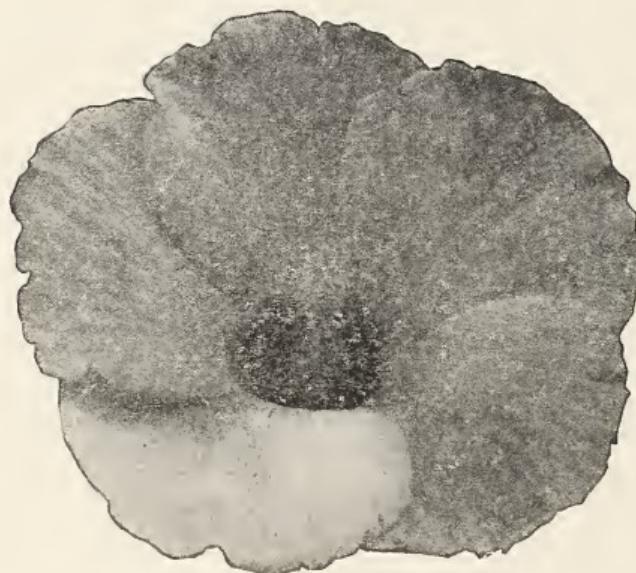

Your order receives individual attention, it is not simply put through a system, it never loses its individuality from the time it is received until it is shipped. Your inquiry is answered by someone who knows. Your request for suggestions is handled by someone of practical experience.

We have exceptional facilities for the developing of both large and small estates or the more modest home grounds, through our connection with a practical and long experienced Landscape Architect and Plantsman.

This organization has at its command architects, engineers, superintendents, foremen, etc., together with an equipment for accomplishing all manner of necessary work.

The descriptions in this catalogue are necessarily brief, color of flower, time of flowering and general character at maturity only are given.

Meehans' Mallow Marvels

Flower from Mid-Summer till frost
Huge Blooms 6 to 12 inches across
Pink, White and Red

You need Mallow Marvels in your garden if you love flowers in August, September, and October. This long period of bloom coupled with their dazzling colors and shades and immense size give them a leading place among the choicest hardy perennials.

Their sterling qualities recommend them to all planters.

Be sure to get our true strains

Better Than a Catalogue

To help you select intelligently, plan harmoniously, care for and cultivate your plants properly, we recommend "Trees, Shrubs and Herbaceous Perennials," by Kirkgaard. A book of 400 pages—illustrations, descriptions, suggestions, plans, etc. Regular price, \$2.50. Our "Special Helpful Service" price, \$1.50.

DECIDUOUS FLOWERING SHRUBS

For the past few years flowering shrubs have been somewhat undervalued in the planting scheme. However, now their beauty and all-around utility are being more appreciated. Besides pretty bloom and attractive foliage, their informal growth and natural grace give a pleasing effect both summer and winter.

"Meehan-Grown" shrubs are past the nursing stage—sturdy plants with good roots show that "Meehan-Grown" is different from ordinary grown plants.

Plant shrubs for the beauty of their flowers, for a screen, for a border, and berry-bearing shrubs for the birds.

Five shrubs of one kind are sold at the ten rate; twenty-five shrubs of one kind are sold at the hundred rate.

All sales according to "Uniform Terms," as found on inside of front cover page.

Sometimes it is necessary for a planting to be made up to cope with unusual conditions or for an unusual space. We are always glad to quote you on groups for shady places—for backgrounds — low-growing groups — berry-bearing for birds — for ground covers — for seashore planting.

Special list of ornamentals,

**February
Nineteen Twenty-four**

A

GENERATION or more ago when people wanted trees and shrubs they naturally turned to Meehans, for every botanist, plant lover or planter knew Thomas Meehan either personally or by reputation as an authority. Both the large and small estates in those days and today are well filled with plants from this Pioneer Nursery of America.

"Meehan-Grown" plants today are still produced according to that Pioneer Standard of Excellence that meant so much a generation ago. As years speed by other nurseries come into existence to fill the demands and offer plants which they say are "as good as Meehans." Can you afford to experiment on somebody's say so? Why not buy "Meehan-Grown" plants direct from Meehans? Your order will be appreciated, our good attention to your wishes will evidence our appreciation.

The coupon will bring our catalogue—not an elaborate picture book, but an honest-to-goodness list of plants in our nurseries with easily understood descriptions and prices.

How may we serve you? Mayhap a planting problem must be solved before placing an order. Tell us; with our long experience we can surely help. If you have already made up a list don't wade through the catalogue. Send the list to us. We will gladly tell you the cost.

"Meehan Service" is as different as "Meehan-Grown" plants (see the postscript notes).

THOMAS MEEHAN & SONS

It is quite evident that these customers were not writing for publication, but they are typical and ring true.

From a customer with a home in Virginia and in Maine:

"I want to take this opportunity to thank you for your unfailing courtesy and interest in small as well as large orders. It is this sort of service that makes Meehans' different from the average commercial nursery, and is certainly appreciated by many of Meehans' customers. I have talked with many who agree."

From a customer in Maryland:

"The trees arrived in good condition, are planted, and the quality of them has had very favorable comments."

You will find an extensive and complete list of "Meehan-Grown" Trees,
Shrubs and Hardy Perennials in our catalogue

There are so many elements entering into the success of trees, that one should hesitate to simply order a tree. Ask us if you desire to know what trees to use for city street, road, a wide avenue—for driveway through lawns and parks—for seashore planting—for dry locations—for massing—trees that are quick growing.

EVERGREENS

CLEMATIS

VINES AND CLIMBERS

Vines that cling, vines that twine, vines that creep, vines that flower, vines that have good foliage, vines that grow quickly.

"Meehan-Grown" vines, due to their good roots, rapidly recover when transplanted, thus demonstrating their vigor.

Five of one kind are sold at the ten rate; twenty-five of one kind at the hundred rate.

All sales subject to "Uniform Terms." See inside of front cover page.

HERBACEOUS PERENNIALS Hardy Garden Flowers

Much charm and color may be added to the home ground by a planting of old-fashioned Hardy Garden Flowers.

A garden of formal design, a border each side of the walk, a bed along the fence, or even if only a few plants in the open spots in the foreground of the shrubbery border, Hardy Garden Flowers will lend their best in helping to beautify the spacious lawn or modest yard.

The most satisfactory plants to use in point of size are two-year-old field-grown. In these the nucleus of the clump is well started and the plants will give a satisfactory account of themselves without several seasons of waiting.

Our plants are all two-year field-grown, have been well cultivated, and are sure to give you much satisfaction.

Five plants of one kind are sold at the ten rate.

Twenty-five plants of one kind are sold at the hundred rate.

All sales according to "Uniform Terms," as found on inside of front cover page.
